

WHAT IS CLAIMED IS:

1. A video camera comprising:

a camera body to image an object; and

a viewfinder removably installed on the camera body to display an image picked up by the camera body,

the viewfinder including a display unit to display an image thereon, and a mounting member removably installable to a finder fixture on the camera body so that the display unit is pivotably installed on the camera body; and

the camera body having provided thereon an accessory-part fixture for fixing an accessory part to the video camera.

2. The video camera as set forth in claim 1, wherein:

the finder fixture is provided at the front side of the camera body and has removably installed thereto an arm member extending from the front to rear side of the camera body; and

the display unit is removably installed to the arm member.

3. The video camera as set forth in claim 1, wherein the display unit is removably installable to the accessory-part fixture.

4. The video camera as set forth in claim 1, wherein at least either the accessory-part fixture or display unit has an auxiliary screw provided thereon.

5. A magnifier comprising:

a magnification lens provided in a viewfinder to magnify an image displayed

on a display unit; and

a polarization filter provided on an optical path of the magnifier,

and wherein the magnifier is removably installable to the viewfinder.

6. A viewfinder comprising:

a display unit having a display screen to display an image; and

a magnifier having a magnification lens to magnify an image displayed on the display screen,

the magnifier having a polarization filter provided on an optical path thereof.

7. The viewfinder as set forth in claim 6, wherein the magnifier is removably installable to the display unit.

8. A video camera comprising:

a camera body to image an object; and

a viewfinder,

the viewfinder including a display unit having a display screen to display an image thereon; and a magnifier having a magnification lens to magnify an image displayed on the display screen; and

the magnifier having a polarization filter provided on an optical path thereof.

9. The video camera as set forth in claim 8, wherein the magnifier is removably installable to the display unit.
